

We set the standard in print-grade plastics.

PRIMEX

PLASTICS CORPORATION

A subsidiary of ICC Industries Inc.

Large enough to
handle your
requirements.

Small enough to
handle your needs.

PRIME IMPAX® / high-impact polystyrene is used for a variety of printing applications such as promotional advertising in grocery store chains, fast food restaurants and department stores. Thicknesses from .010-.400, with controlled matte finish to ensure excellent ink adhesion for both silk-screening & offset lithography.

Weather or not....

When you need indoor or outdoor plastic sheet for your Printing applications, **think Primex!**

PRIME COR-X® / corrugated polypropylene is recommended for both indoor and outdoor use in agricultural, industrial and Point of Purchase displays. Prime Cor-x is both lightweight and sturdy. Prime Cor-X is weather resistant when treated with UV and remains recyclable after printing. Available in gauges of 2MM-12MM and in white, natural & 10 standard colors.
