

ABSOLVE®

Our ABSOLVE materials are designed with advanced technology that facilitates degradation* in a microorganism enriched environment.

Provides a sustainable product option for customers that are looking for environmental alternatives.

* Claim based on information provided by suppliers

Customization

ABSOLVE is a modified material that can be polyethylene, polypropylene, polystyrene, or corrugated plastic based that look's, feels and processes like their counterparts. Available in sheet and roll form for printing, forming, fabrication, or any application where standard plastics are currently used. *Claim based on certification provided by suppliers.

ABSOLVE can be color matched to meet your specific requirements through our vertical integration with Primex Color, Compounding & Additives.

Sustainability

Sustainability includes considering the product's circularity or end of life during the design of the finished product. Prime Absolve can be recycled as a post-industrial or post-consumer product depending on the base polymer. Contact your Primex Territory Business Manager or check with local recycling facilities to determine where it is collected and recycled.

Primex Sustainability: A better tomorrow, starting today!
