

BIOGRAPH.ICS®

Prime BioGraph.ics is manufactured from renewable, bio-based materials, certified through an independent laboratory as compostable in aerobic municipal and industrial composting facilities as per ASTM D6400-19*.

This means that it will biodegrade, thus returning to its basic organic elements.

BioGraph.ics is an exclusive custom extruded product that is manufactured from bio-based materials utilizing renewable energy. This unique formulation is used as a substitute to traditional petroleum-based plastics resins.

BioGraph.ics is available in sheets for offset, screen and digital printing. This unique Bio-based formulation can replace single use plastic products in several types of graphic applications.
