

Prime Bubble-X®

Our Prime Bubble-X is a sheet/air-bubble co-extruded polypropylene board made of three layers: a central thermoformed core and two flat, compact external skins with matte finishes. These external layers are smooth and corona-treated to provide outstanding printing performance.

Very strong polypropylene sheet. Ideal for Point of Purchase displays, indoor/outdoor signage, totes, sleeve packs, and other packaging application.

Customization

Prime Bubble-X can be digitally and screen printed, drilled, routed, sawed, can be die cut, and laser cut. Available in white, gray, and black. Gauges 2.6 to 9.5 mm with widths up to 60”.

Sustainability

Sustainability includes considering the product’s circularity or end of life during the design of the finished product. Prime Bubble-X is a polypropylene (recycle code 5) that can be recycled as a post-industrial or post-consumer product. Contact your Primex Territory Business Manager or check with local recycling facilities to determine where it is collected and recycled.

Primex Sustainability: A better tomorrow, starting today!
