

DIGI-HIPS®

DIGI-HIPS, is a specialized high impact polystyrene designed for UV or LED digital printing. It offers improved impact resistance after printing, making post-printing processes such as fabrication, die cutting, and routing easier.

Digi-HIPS is an excellent choice for standard UV and LED digital printing. The perfect material for back-lit signage or applications where there is a need for added UV resistance. It is available with or without corona treatment.

Customization

Our DIGI-HIPS comes in a variety of colors, opacities, and controlled textures to meet your specific requirements. With thicknesses ranging from 0.010 to 0.1875, it can be color matched through our vertical integration with Primex Color, Compounding & Additives to ensure the perfect custom solution for your printing needs.

Sustainability

Sustainability includes considering the product's circularity or end of life during the design of the finished product. Prime DIGI-HIPS is a polystyrene (recycle code 6) that can be recycled as a post-industrial or post-consumer product. Contact your Primex Territory Business Manager or check with local recycling facilities to determine where it is collected and recycled.

Primex Sustainability: A better tomorrow, starting today!
