

Proven, custom solutions to increase efficiency in your distribution chain.

Why choose reusable, custom plastic solutions from Primex Design & Fabrication?

- Cost efficiency
- Durability
- Sustainable and Recyclable
- Ergonomically friendly
- Space optimization
- Ability to ship flat for freight savings
- Aesthetics- Our plastic products stay vibrant much longer than paper counterparts!

Our hopper front shelf bins are designed to make retrieving product **easy and efficient**. With the ability to customize to your specific application, rack system or custom dimensions; your distribution space can be **optimized to fullest capacity**.

Picking solutions including totes, trays and bins are designed for use by **both machines and people**.

Made with durable materials, our solutions are made to last and are **100% recyclable** at the end of the product lifecycle.

Shipping solutions to keep your products safe in transport.

Why choose UltraPac-360 Series™ sleeve packs?

- Lighter weight than molded bulk containers
- Moisture and weather resistant
- Impact and tear resistant
- More durable than gaylords
- Totally recyclable
- Dust free
- Non-toxic
- Chemically inert
- Ergonomically friendly

ULTRAPAC
360 SERIES™

Sleeve packs offer up to 85% volume reduction in storage and empties return.
