

Prime ReCycle™ Materials

Prime ReCycle Materials are available in a variety of polymers; Polystyrene, ABS, Polyethylene, Polypropylene and many more.

Primex continues to lead with environmentally friendly practices and engineered products that focus on the principles of the 4R's - REDUCE, REUSE, RECYCLE and REPLACE.

Customization

Prime ReCycle Materials were designed for the customer that desires Post-Industrial Recycle Content Materials*. For many years, Primex Plastics has provided our customers with several recycled content material options in many colors with a sustainability/environmental focus. Our goal is to continue to provide to the marketplace material options that support our sustainability focus.

Sustainability

Sustainability includes considering the product's circularity or end of life during the design of the finished product. Many of our Prime ReCycle products can be recycled as a post-industrial or post-consumer products. Contact your Primex Territory Business Manager or check with local recycling facilities to determine where it is collected and recycled.

Primex Sustainability: A better tomorrow, starting today!

*Due to the nature of raw materials being used, colors, opacity, and/or surface aesthetics may vary from lot to lot. Colors may be limited.
