

Graphic Design and Digital Print Services

With one of the newest and most innovative digital printers on the market, Primex Design & Fabrication is ready to take your fabricated plastic products to the next level and offer branding like you've never experienced before.

Whether you're looking for protective packaging, branded shipping solutions or custom signage and displays - we can help.

Graphic Design Services

Looking for custom, branded products but need someone to do the designing? Our graphic designers are experts in creating artwork that reflects your brand aesthetic and will attract customers. With years of experience, our designers are here to help you achieve your branding goals.

Digital Print Services

From corrugated products to displays and signage, our innovative digital printer can tackle it all. Eight picoliter print heads allow for higher resolution, finer printing quality, and sharpness. Variodrop Printing Technology allows us to print in multiple resolutions.

For more information on any of our materials, please call your Primex business manager or one of our locations nearest you.

Printer Specifications

Our printed plastics solutions can be formulated for optimal strength and durability. We create custom solutions to fit your needs and offer options that are lightweight, have a broad range of feel, ease of formability, and more.
